A Safe Savings Bank

During its more than twenty-three years of existence, the Hyde Park Savings Bank never lost a dollar by a poor note, a poor stock or a poor bond.

This can only mean that its managers possess great conservatism, excellent judgment and painstaking care.

It means a close adherence to the motto of the bank from its start, namely: "Safety first, last and always;" "high rates of interest—never."

Deposits in this bank receive 4 per cent interest, compounded semi-annually, with all the taxes paid by the Bank.

Vermont Banks

CONTINUED FROM PAGE THREE

has increased \$5,623,978.27; the amount of deposits of non-residents has increased \$1,826,636.69. The number of depositors having more than \$2,000 each of deposits has increased 1,709 and the amount of such deposits have increased \$6,123,929.30. The state banks have paid to the state in taxes during the year \$535,481.09, being an increase over the previous year of \$45,192.31. The banks have paid depositors interest during the year, \$2,726,950.42, being an increase of \$172,034.89 over the previous year.

During the past few years there has been a remarkable increase in deposits and number of depositors in the banks of Vermont, culminating this year in the largest increase in the history of the state. This indicates that the number of persons in Vermont who are saving and accumulating money against future needs is increasing. The average deposit of each resident of Vermont is \$396.29 and examination for the deposits in the banks of the state by the bank commissioner discloses the fact that a very large proportion of the \$80,000,000 of deposits is owned by people of small means and that only a comparatively small amount of this money would pay any tax to the state or municipalities, were it not for the fact that it is accumulated in the banks.

Boom for Montgomery.

At a special town meeting at Montgomery it was voted 167 to 67 to exempt from taxation the Nelson & Hall company for a period of 10 years. The firm is to build a new veneer plant on the Kelting meadow, and it will probably be one of the largest mills of the kind in northern Vermont, costing between \$70,000 and \$50,000, the latter sum being already at hand to build with. The town already has a large concern in the spruce butter tub factory of John C. Hutchins. It is said to be one of the largest in the world. The town also has the largest cuts of hardwood timber tributary to the village of any place in northern Vermont. The new mill will increase the value of real estate.

Writes on Liquor Question.

The Rev. C. H. Smith, superintendent of the Vermont Anti-Saloon League, has written an open letter to the members of the next legislature which is published in the Vermont edition of The American Issue for September in which he says in part:

"As you well know, there is much political unrest and dissatisfaction with things as they are at the present time. The old order is changing. Men are eager for better conditions of existence. Numerous remedies are offered both by physicians of old and new schools for the diseases of the body and soul.

"Judging from past experience a vast mass of supposed improvements on existing laws will be brought to your attention. There will be various and often discordant opinions within and without your honorable body as to what ought to be done. The Anti-Saloon League as an organization is interested in one subject only that will come to your attention, viz., legislation relating directly to the liquor traffic and its results.

"We believe in the speediest possible extinction of this traffic and we beg to remind you that the people of this state registered their emphatic judgment against the liquor business last March by giving a majority of over 9,000 votes, 225 votes against license and in the remaining 21 the yes majority was reduced about one-third.

"We believe this sentiment is increasing in strength. We look to you as our representatives and as citizens who desire a better as well as a bigger Vermont to enact legislation helpful to the cause of temperance and to erect any proposed measure looking toward the extinction of the liquor traffic in our state."

T. L. Parks, Murrayville, Ga., Route 1, is in his 73rd year, and was recently cured of a bad kidney and bladder trouble. He says himself: "I have suffered with my kidneys. My back ached and I was annoyed with bladder irregularities. I can truthfully say, one 50c bottle of Foley's Kidney Pills cured me entirely." They contain no habit forming drugs. F. D. Pierce.

Miss Hattie Berry of Portsmouth, N. H., visited relatives in town last week. She went to Newport Saturday. Miss Berry intends to leave Newport for Southern Pines, October 2.

There was a Progressive rally and flag raising Thursday evening. Dr. Aldrich of St. Johnsbury and E. A. Cook of Lyndonville were the speakers. Homer T. Wilson of Lyndon sang several campaign songs. Rev. A. E. Chandler gave a fine toast to the flag as it was unfurled. The applause given the singer and speakers showed the high appreciation of the audience.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, an anodyne, is a blood and mucous surface cure. It is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CENEY & CO., Toledo, Ohio. Sold by Druggists. Take Hall's Family Pills for constipation.

The New Parcels Post.

One of the most important acts of the last Congress, and one that has not yet received the attention it deserves, was a provision for a zone system of parcels post, which passed as an item of the postal appropriation bill. The bill will go into operation on January 1 and it will require much work to prepare for the inauguration of this new service during the next four months.

This business will utilize all transportation systems now used by private express companies and will cover more than a million miles of rural delivery and star routes. All kinds of merchandise that can be transported with safety, including products of the farm, garden and factory, may be mailed, provided they do not weigh more than eleven pounds, or exceed seventy-two inches in combined length and girth. As the present mail service arrangements are not adequate for this purpose new equipment must be provided. Careful regulations for packing will be prescribed and distinctive stamps will be provided ranging from one cent to one dollar. The rates are fixed according to a zone system.

There will be a flat rate of one cent an ounce up to four ounces without regard to distance and above four ounces the rates are by the pound or fraction thereof.

For rural route and city delivery the first pound will be 5 cents, each additional pound one cent and eleven pounds will be 15 cents. Within a 50-mile zone the first pound will be 5 cents, each additional pound will be 3 cents, and eleven pounds will be 35 cents. Within a 150-mile zone the first pound will be 6 cents, each additional pound 4 cents, and eleven pounds will be 46 cents. Within a 300-mile zone the first pound will be 7 cents, each additional pound 5 cents, and eleven pounds will be 57 cents. Within a 600-mile zone the first pound will be 8 cents, each additional pound 6 cents, and eleven pounds will be 68 cents. Within a 1,000-mile zone the first pound will be 9 cents, each additional pound 7 cents, and eleven pounds will be 79 cents. Within a 1,400-mile zone the first pound will be 10 cents, each additional pound 9 cents, and eleven pounds will be 110 cents. Within a 1,800-mile zone the first pound will be 11 cents, each additional pound 10 cents, and eleven pounds will be 121 cents. For distances over 1,800 miles the first pound will be 12 cents, each additional pound 11 cents, and eleven pounds will be 132 cents.

It remains to be seen how valuable this new system will be. There has been an urgent demand for the parcels post. It has been demonstrated by government investigation that the express companies have made exorbitant profits. There is need of some change in the transportation rates on small parcels, beyond question, and the first attempt will be somewhat in the nature of an experiment. There will be some persons who will complain because the law is not more nearly like the European method, but it must be remembered that in countries like England, France and Germany the distances are not great, whereas the United States truly is a country of "magnificent distances." It is probable that the new system will prove a great convenience to many people. It will be viewed, naturally, with some alarm by merchants, who fear the competition of the mail-order houses. It remains to be demonstrated how well grounded are these fears. Very likely the harm done to the trade of local dealers will not be as great as many imagine. It will be necessary for merchants to adjust themselves to new conditions, but there are some very distinct advantages which the home dealer always will possess. He can give credit. If the purchase is not satisfactory he can exchange it easily and speedily. The purchaser will find it safer to see what he is buying than to order from a catalogue. There is no buying "a pig in a bag" when the local dealer is patronized.

If the local dealer employs the best modern methods of satisfying his customers, and advertises judiciously and demonstrates his natural advantages, in the long run he is likely to hold his trade. At first there may be a falling off, due to a desire to test a new method, but in the long run it is reasonably certain that home dealers will not lose a large amount of patronage. And in any event the people have a right to buy as they please.—Montpelier Journal.

Crawford
Ranges

A suggestion to cooks;—ask somebody who has used a Crawford range—and you will very easily find such a person—what the patented Single Damper of the Crawford means as a help in cooking. All other ranges have two—or more—dampers; hence damper mistakes.

Also, the scientific Cup-Joint curved heat flues that heat the oven in every part alike; the Ash Hod that takes the place of the clumsy ash pan; the Patented Grates; the powerful waterfronts and other time, trouble and money saving improvements peculiar to Crawfords; ask about these. If you will do this we believe your next range will be a Crawford.
